Application for Intern- or Assistantship (composer / engineer)

Dear Sir or Madame,

My name is Leo Brennauer, I'm from Germany and for the weeks to come I'm living right next to Santa Monica. With this letter, I would like to ask if you are having any intern- or assistantship openings that I might apply for. If this is the case, I would be pleased if you would give me the opportunity to introduce myself:

I'm a musician, engineer and producer that plays many instruments since childhood. My music career developed with my six-year apprenticeship in a music store where I became familiar with all kinds of instruments but also the technical aspects of music production. During this time, I met a studio owner and subsequently worked part-time in his studio. I prepared ProTools sessions, assisted with recordings and helped with audio editing. On the side, I worked out of my own little studio, composing, recording, producing and mixing solo-artists. All of this ultimately led me to study and pursue a career in music: I am a student at the Zurich University of Arts, in his last year bachelor's Composition for film, theater, and media.

My musical interests have always been varied and diverse: I have played and composed in rock bands, pop bands, jazz and church ensembles. I played percussion in a number of symphonic string- and brass-orchestras. In many bands, I was responsible for the technical implementation. For my former band *Rigoros* (+150 concerts), I put together live rigs, on-stage tech, planned, and set up PA systems and even mixed occasionally. This period in my life, when I was working a 9-5 job, producing my band in the studio, touring on weekends, and working on PR in every free minute, was very exhausting, but has taught me many skills and made me a very resilient person.

Since I have always been very technically inclined, my strengths lie especially in editing, midi-programming and -cleaning, preparing studio- and mix-sessions, enhancing workflow and DAW (especially Cubase and ProTools) as well as producing and mixing. I have become very fast at these things over the years. In my studies, I was also educated in scoring to picture, score-writing, music-theory and orchestration. Due to my previous studies, Bachelor Professional of Trade and Commerce (CCI) as well as my recent job as head of the student association office, I can also help with administrative tasks. And if needed, I would even offer to make coffee, fetch drinks, or do other runner tasks. I would be happy to bring any of my skills, my endurance and my enthusiasm to you and your team and learn and gain experience from the one of Hollywood's most successful composers and studios.

If you would like to get a taste of my music, I would be happy if you visit my portfolio website: <https://leo-brennauer.de/portfolio>

Getting the chance to apply for a job like this, is very exciting and I sincerely hope you will give my application consideration. If you would like to meet me in person, I would be very happy to receive an invitation.

I'm look forward to hearing from you.

With best regards from Westdale/Palms (L.A.),
Leo Brennauer
